Alkaline serine proteinase (EC 3.4.-.-) I precursor - Alteromonas sp.
NiAlternate names: sutilase
C.Species: Alteromonas sp.
C.Species: Alteromonas sp.
C.Species: Alteromonas sp.
C.Accession: UG4908
B;TSujibo, H.; Myamoto, K.; Tanaka, K.; Kaidzu, Y.; Imada, C.; Okami, Y.; Inamori, X.
Biosci. Blotechnol. Blotechnol.
A;Accession: UG4908
A;Title: Cloning and sequence analysis of a protease-encoding gene from the maxine bact A;Reference number: UG4908; MUID:97141200; PMID:8987544
A;Accession: UG4908
A;Accession: UG4908
A;Status: preliminary
A;Molecule Cype: DNA
A;Residues: 1-715 <TSU-
A;Cross-references: DDBJ:D38600; NID:g1536787; PIDN:BAA18912.1; PID:d1019647; PID:g2160
A;Experimental source: strain O-7
C.Comment: This enzyme belongs to class I subtilisin-like family. It is a chelator-sens
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             418

N.Alternate names: hyperthermostable proteinase
C.Species: Staphylothermus marinus
C.Species: Ascession: T29000
R.Mary, J.; Lupas, A.; Kellermann, J.; Eckerskorn, C.; Baumeister, W.; Peters, J.
Curr. Biol. 6, 739-749, 1996
A.Title: A hyperthermostable protease of the subtilisin family bound to the surface J.
A.Accession: T29000
A.Mories: 20559; MUID:96385442; PMID:8793300
A.Status: preliminary; translated from GB/EMBL/DDbJ
A.Molecule type: DMA
A.Molecule type: DMA

An der Ocst J., Siezen R.J.;

The "purification, characterization, and molecular modeling of pyrolysin
and other extracellular thermostable serine protesses from
thyperhermophilic micrororganisms.";

Meth. Enzymol. 330:383-393(2001).

-!- FUNCTION: Has endopeptidase activity toward caseins, casein
fragments including alpha-Si-casein and synthetic peptides.

-!- FUNCTION: And pyrolysin seems to be produced by autoproteolytic
activation of HWM pyrolysin.

"Nucleotide and derived amino acid sequence of the subtilisin from
the antarctic psychrotroph Bacillus TA39.";
Elochim. Bappys. Accalla:111.13:13.";
Elochim. Bappys. Accalla:111.13:13.";
Elochim. Bappys. Accalla:111.13:13.";

It caralyzes the hydrolysis of proteins and peptide amides.

It caralyzes the hydrolysis of proteins and peptide amides.

In PL Hydrolyzes peptide amides.

In PL Hydrolyzes peptide amides.

In PL Hydrolyzes peptide amides.

In COPACTOR: Binds I calcium ion per subunit (Potential).

In SUBCELLULAR LOCATION: Secreted.

In MISCELLANEOUS: Still active at temperatures close to 0 degrees amize a marked heat lability.

In MISCELLANEOUS: Secretion of subtilisin is associated with onset of sporulation, and many mutations which block sporulation at early stages affect expression levels of subtilisin. However, subtilisin is in not necessary for normal sporulation.

In SIMILARITY: Belongs to peptidase family S8.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          This SWISS-PROT entry is copyright.
